### **Application Description**

Brock Maps is being developed to fill a need to ease the life of students at Brock University. For a first year student or even returning student, university can be a complicated lifestyle. Finding rooms, remembering schedules and assignment due dates can be a stressing matter when under a heavy workload. Brock Maps will be utilizing a combination of school navigation, agenda, and memos to be an all in one program for a student to plan out their school routines. With added functionality to navigate a student to a desired location within the school or do a virtual tour of the school like Google Street View. This application will keep a student's class, and assignment schedule and place reminders and convenient times to ensure the student will be able to appropriate time responsibly.

### **Request Description**

In order to ensure a complete and working model of our application, photos of the third floor of Mackenzie Chown are required for the virtual tour. Photos of hallways, classrooms and labs will be taken by us, and used only in the project. Upon completion of the course, we will delete the photos if so requested.
