

`courses` contains all possible courses, such as COSC 3F00, a description of the course (Software Engineering, etc), and who teachers the course.

`offerings` is each type of class that is held for each course. So COSC 3F00 technically has a LEC and a LAB. The existence of those is stored here. The PK is just some AUTO\_INCREMENT to simplify the next table.

`offering\_times` indicates which day/time each offering takes place. `timestart` and `timeend` are the 24h time.
