Application Description

Brock Maps is being developed to fill a need to ease the life of students at Brock University. For a first year student or even returning student, university can be a complicated lifestyle. Finding rooms, remembering schedules and assignment due dates can be a stressing matter when under a heavy workload. Brock Maps will be utilizing a combination of school navigation, agenda, and memos to be an all in one program for a student to plan out their school routines. With added functionality to navigate a student to a desired location within the school or do a virtual tour of the school like Google Street View. This application will keep a students class, and assignment schedule and place reminders and convenient times to ensure the student will be able to appropriate time responsibly.

Request Description

In order to ensure a complete and working model of our application, maps of The Third floor of Mackenzie Chown are required. We are not able to create our own maps from scratch as this would create accuracy issues, therefore these maps need to be supplied. We understand the security risks behind being in possession of the school maps and will ensure proper responsibility. We will be creating our own maps based off of the originals displaying only the information needed by the user such as classrooms, hallways, bathrooms, etc. To ensure further security the provided maps will be deleted upon completion of the application and project.
