GET Request

http://www.brocku.ca/registrar/guides/returning/timetable/a_get_subj.php?subj={{SUBJ}}

We will have to create a list of subject codes.

`courses.id` is a formatted string. Dumb as hell, but it's brock's idea. Not mine.
It has the following format.

XXXXYZZ

where XXXX is a unique course identifier. eg COSC 1P02 lectures, labs, etc will always be 3501.

Y is the type.
1 - LEC
2 - SEM
4 - LAB
5 - TUT

ZZ is the number, like 03 would be LAB3 for example.
